

**SAVE THE DATE!**  
Cohorts start as early as the week  
of January 8, 2024

# Join iMPROve Health for **EMBRACE** an ECHO Movement for Breast and Cervical Cancers

**What is EMBRACE?**

iMPROve Health is hosting a 9-month ECHO program to **support healthcare professionals in increasing screening rates for breast and cervical cancers among populations experiencing health disparities.** We know that chances of survival increase with early cancer detection, which is why cancer screening is vital. This ECHO program highlights best practices, evidence-based interventions, and process improvement methodology.

## When will EMBRACE occur?

EMBRACE will host multiple cohorts. **Cohorts begin as early as the week of January 8, 2024**, and take place every other week for 18 sessions from January through September 2024. Each session is one hour.

## Benefits of joining EMBRACE

- Join a supportive network of your peers, a “community of practice.”
- Gain expertise in breast and cervical cancers and become a local expert.
- Learn best practice guidelines from subject matter experts to use in your practice.
- Share experiences and receive recommendations with case-based learning opportunities.
